

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

|               |                     |         |     |
|---------------|---------------------|---------|-----|
| Creation date | 27th September 2013 | Version | 6.0 |
| Revision date | 31st March 2025     |         |     |

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

- 1.1. Product identifier**  
Substance / mixture MA PROFESSIONAL PTFE GREASE  
Number mixture  
UFI M-31032025  
KMOVV-MOXF-G000-W9GW
- 1.2. Relevant identified uses of the substance or mixture and uses advised against**  
**Mixture's intended use**  
Lubricating agent.  
**Main intended use**  
PC-TEC-11 Lubricants, greases, release agents  
**Mixture uses advised against**  
The product should not be used in ways other than those referred in Section 1.
- 1.3. Details of the supplier of the safety data sheet**  
**Manufacturer**  
Name or trade name AMTRA Sp. z o. o.  
Address Schonów 3, Sosnowiec, 41-200  
Poland  
VAT Reg No PL6250009241  
Phone +48 32 294 41 00  
E-mail amtra@amtra.pl  
**Competent person responsible for the safety data sheet**  
Name AMTRA Sp. z o. o.  
E-mail amtra@amtra.pl
- 1.4. Emergency telephone number**  
European emergency number: 112

### SECTION 2: Hazards identification

- 2.1. Classification of the substance or mixture**  
**Classification of the mixture in accordance with Regulation (EC) No 1272/2008**

The mixture is classified as dangerous.

Aerosol 1, H222, H229  
Asp. Tox. 1, H304  
Skin Irrit. 2, H315  
STOT SE 3, H336  
Repr. 2, H361  
STOT RE 2, H373 (nervous system) (inhalation)  
Aquatic Chronic 2, H411

#### Most serious adverse physico-chemical effects

Pressurised container: May burst if heated. Extremely flammable aerosol.

#### Most serious adverse effects on human health and the environment

Causes skin irritation. May cause drowsiness or dizziness. Suspected of damaging fertility or the unborn child. May cause damage to the nervous system through prolonged or repeated exposure if inhaled. May be fatal if swallowed and enters airways. Toxic to aquatic life with long lasting effects.

- 2.2. Label elements**

#### Hazard pictogram

#### Signal word

Danger

#### Hazardous substances

Hydrocarbons, C6-C7, n-alkanes, isoalkanes, cyclics, >5% n-hexane

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

Creation date 27th September 2013  
Revision date 31st March 2025 Version 6.0

### Hazard statements

H222 Extremely flammable aerosol.  
H229 Pressurised container: May burst if heated.  
H315 Causes skin irritation.  
H336 May cause drowsiness or dizziness.  
H361 Suspected of damaging fertility or the unborn child.  
H373 May cause damage to the nervous system through prolonged or repeated exposure if inhaled.  
H411 Toxic to aquatic life with long lasting effects.

### Precautionary statements

P102 Keep out of reach of children.  
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
P211 Do not spray on an open flame or other ignition source.  
P251 Do not pierce or burn, even after use.  
P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50 °C.  
P501 Dispose of contents/container to according to applicable regulations.

### Requirements for child-resistant fastenings and tactile warning of danger

Container must carry a tactile warning of danger.

### 2.3. Other hazards

The mixture does not contain substances with endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605. Mixture does not contain any substance meet the criteria for PBT or vPvB in accordance with Annex XIII of Regulation (EC) No. 1907/2006 (REACH) as amended. Does not contain any PMT or vPvM components.

## SECTION 3: Composition/information on ingredients

### 3.2. Mixtures

Mixture contains these hazardous substances and substances with the highest permissible concentration in the working environment

| Identification numbers                                | Substance name                                                    | Content in % weight | Classification according to Regulation (EC) No 1272/2008                                                                                                                       | Note |
|-------------------------------------------------------|-------------------------------------------------------------------|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|

### Notes

- 1 Note C: Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers. In this case the supplier must state on the label whether the substance is a specific isomer or a mixture of isomers.

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

|               |                     |         |     |
|---------------|---------------------|---------|-----|
| Creation date | 27th September 2013 | Version | 6.0 |
| Revision date | 31st March 2025     |         |     |

- 2 *Note U (Table 3): When put on the market gases have to be classified as "Gases under pressure", in one of the groups compressed gas, liquefied gas, refrigerated liquefied gas or dissolved gas. The group depends on the physical state in which the gas is packaged and therefore has to be assigned case by case. The following codes are assigned:*

*Press. Gas (Comp.)  
Press. Gas (Liq.)  
Press. Gas (Ref. Liq.)  
Press. Gas (Diss.)*

*Aerosols shall not be classified as gases under pressure (See Annex I, Part 2, Section 2.3.2.1, Note 2).*

Full text of all classifications and hazard statements is given in the section 16.

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

Do not perform artificial respiration without self-protection (e.g. a mask). If any health problems are manifested or if in doubt, inform a doctor and show him information from this safety data sheet.

##### **If inhaled**

Terminate the exposure immediately; move the affected person to fresh air. Take care of your own safety, do not let the affected person walk! Beware of the contaminated clothes. Depending on the situation, call the medical rescue service and ensure medical treatment considering the frequent need of further observation for at least 24 hours.

##### **If on skin**

Remove contaminated clothes. Wash the affected area with plenty of water, lukewarm if possible.

##### **If in eyes**

Rinse eyes immediately with a flow of running water, open the eyelids (also using force if needed); remove contact lenses immediately if worn by the affected person. Rinsing should continue at least for 10 minutes. Provide medical treatment, specialized if possible.

##### **If swallowed**

If the affected person vomits, make sure to prevent inhalation of the vomit (as there is a danger of lung damage after inhalation of these liquids in the airways also in infinitesimal amount). Provide medical treatment considering the frequent need of further observation for at least 24 hours. Bring an original container with the label and the Safety Data Sheet of the given substance as appropriate.

#### 4.2. Most important symptoms and effects, both acute and delayed

##### **If inhaled**

Cough, headache. May cause drowsiness or dizziness.

##### **If on skin**

Causes skin irritation.

##### **If in eyes**

When intruding eyes, it can evoke irritation.

##### **If swallowed**

Irritation, nausea.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Symptomatic treatment.

### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

##### **Suitable extinguishing media**

Alcohol-resistant foam, carbon dioxide, powder, water spray jet, water mist.

##### **Unsuitable extinguishing media**

Water - full jet.

#### 5.2. Special hazards arising from the substance or mixture

In the event of fire, carbon monoxide, carbon dioxide and other toxic gases may arise. Inhalation of hazardous degradation (pyrolysis) products may cause serious health damage.

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

Creation date 27th September 2013

Revision date 31st March 2025

Version

6.0

### 5.3. Advice for firefighters

Self-Contained Breathing Apparatus (SCBA) with a chemical protection suit only where personal (close) contact is likely. Use a self-contained breathing apparatus and full-body protective clothing. Closed containers with the product near the fire should be cooled with water. Do not allow run-off of contaminated fire extinguishing material to enter drains or surface and ground water.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Provide sufficient ventilation. Pressurised container: May burst if heated. Extremely flammable aerosol. Remove all ignition sources. Use personal protective equipment for work. Follow the instructions in the Sections 7 and 8. Do not inhale aerosols. Prevent contact with skin and eyes.

### 6.2. Environmental precautions

Prevent contamination of the soil and entering surface or ground water. Do not allow to enter drains.

### 6.3. Methods and material for containment and cleaning up

Spilled product should be covered with suitable (non-flammable) absorbing material (sand, diatomaceous earth, earth and other suitable absorption materials); to be contained in well closed containers and removed as per the Section 13. In the event of leakage of the substantial amount of the product, inform fire brigade and other competent bodies. After removal of the product, wash the contaminated site with plenty of water. Do not use solvents.

### 6.4. Reference to other sections

See the Section 7, 8 and 13.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Prevent formation of gases and vapours in flammable or explosive concentrations and concentrations exceeding the occupational exposure limits. The product should be used only in the areas where it is not in contact with open fire and other ignition sources. Use non-sparking tools. Use of antistatic clothes and footwear is recommended. Do not inhale aerosols. Prevent contact with skin and eyes. No smoking. Protect against direct sunlight. Do not pierce or burn, even after use. Wash hands and exposed parts of the body thoroughly after handling. Do not spray on an open flame or other ignition source. Use only outdoors or in a well-ventilated area. Use personal protective equipment as per Section 8. Observe valid legal regulations on safety and health protection. Avoid release to the environment.

### 7.2. Conditions for safe storage, including any incompatibilities

Recommended storage temperature is from +5 °C to +30 °C. Protect against frost. Protect from sunlight. Store in tightly closed containers in cold, dry and well ventilated areas designated for this purpose. Store locked up. Keep container tightly closed. Do not expose to temperatures exceeding 50 °C.

### 7.3. Specific end use(s)

not available

## SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

The mixture contains no substances for which occupational exposure limits are set.

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

|               |                     |         |     |
|---------------|---------------------|---------|-----|
| Creation date | 27th September 2013 | Version | 6.0 |
| Revision date | 31st March 2025     |         |     |

### 8.2. Exposure controls

Take off contaminated clothing and wash before reuse. Follow the usual measures intended for health protection at work and especially for good ventilation. This can be achieved only by local suction or efficient general ventilation. If exposure limits cannot be observed in this mode, suitable protection of airways must be used. Do not eat, drink and smoke during work. Wash your hands thoroughly with water and soap after work and before breaks for a meal and rest.

#### Eye/face protection

Protective goggles.

#### Skin protection

Hand protection:

Chemical resistant gloves should be worn whenever working with chemical products when a risk assessment indicates this is necessary.

The selected protective gloves must meet the requirements of the EN 374-1 standard. Recommended for long-term contact:

Material for protective gloves: nitrile rubber. Thickness: 0.11 mm

Breakthrough time: > 480 min.

Efficiency class: 6

Recommended for momentary contact:

Material for protective gloves: nitrile rubber

Thickness: 0.11 mm

Breakthrough time: > 480 min.

Efficiency class: 6

Hand protection: Protective gloves resistant to the product. When choosing appropriate thickness, material and permeability of the gloves, observe recommendations of their particular manufacturer. Observe other recommendations of the manufacturer. Other protection: protective workwear. Contaminated skin should be washed thoroughly.

#### Respiratory protection

Respirator.

#### Thermal hazard

Not available.

#### Environmental exposure controls

Observe usual measures for protection of the environment, see Section 6.2. Collect spillage.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

|                                                          |                                   |

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

not available

#### 10.2. Chemical stability

The product is stable under normal conditions.

#### 10.3. Possibility of hazardous reactions

Unknown.

#### 10.4. Conditions to avoid

The product is stable and no degradation occurs under normal use. Protect against flames, sparks, overheating and against frost. Pressurised container: May burst if heated.

#### 10.5. Incompatible materials

Protect against strong acids, bases and oxidizing agents.

#### 10.6. Hazardous decomposition products

Not developed under normal uses. Dangerous outcomes such as carbon monoxide and carbon dioxide are formed at high temperature and in fire.

### SECTION 11: Toxicological information

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Inhalation of solvent vapors above values exceeding exposure limits for working environment may result in acute inhalation poisoning, depending on the level of concentration and exposure time. No toxicological data is available for the mixture.

##### Acute toxicity

No data are available for either the mixture or the components. Based on the available data, the criteria for classification of the mixture are not met.

##### Skin corrosion/irritation

Causes skin irritation. Data for the components of the mixture are not available.

##### Serious eye damage/irritation

No data are available for either the mixture or the components. Based on the available data, the criteria for classification of the mixture are not met.

##### Respiratory or skin sensitisation

No data are available for either the mixture or the components. Based on the available data, the criteria for classification of the mixture are not met.

##### Germ cell mutagenicity

No data are available for either the mixture or the components. Based on the available data, the criteria for classification of the mixture are not met.

##### Carcinogenicity

No data are available for either the mixture or the components. Based on the available data, the criteria for classification of the mixture are not met.

##### Reproductive toxicity

Suspected of damaging fertility or the unborn child. Data for the components of the mixture are not available.

##### Toxicity for specific target organ - single exposure

May cause drowsiness or dizziness. Data for the components of the mixture are not available.

##### Toxicity for specific target organ - repeated exposure

May cause damage to the nervous system through prolonged or repeated exposure if inhaled. Data for the components of the mixture are not available.

| Revision date | 31st March 2025     |         |     |

### Aspiration hazard

May be fatal if swallowed and enters airways. Data for the components of the mixture are not available.

### 11.2. Information on other hazards

#### Endocrine disrupting properties

Based on the available data, the criteria for classification of the mixture are not met. Does not contain any components that may cause endocrine disruption for humans.

#### Other information

not available

## SECTION 12: Ecological information

### 12.1. Toxicity

Toxic to aquatic life with long lasting effects. Data for the components of the mixture are not available.

### 12.2. Persistence and degradability

No data are available for either the mixture or the components.

### 12.3. Bioaccumulative potential

No data are available for either the mixture or the components.

### 12.4. Mobility in soil

Based on the available data, the criteria for classification of the mixture are not met. Does not contain any PMT or vPvM components.

### 12.5. Results of PBT and vPvB assessment

Based on the available data, the criteria for classification of the mixture are not met. Does not contain any PBT or vPvB components.

### 12.6. Endocrine disrupting properties

Based on the available data, the criteria for classification of the mixture are not met. Does not contain any components that may cause endocrine disruption in the environment.

### 12.7. Other adverse effects

Data not available.

## SECTION 13: Disposal considerations

### 13.1. Waste treatment methods

Hazard of environmental contamination; dispose of the waste in accordance with the local and/or national regulations. Any unused product and contaminated packaging should be put in labelled containers for waste collection and submitted for disposal to a person authorised for waste removal (a specialized company) that is entitled for such activity. Do not empty unused product in drainage systems. The product must not be disposed of with municipal waste. Empty containers may be used at waste incinerators to produce energy or deposited in a dump with appropriate classification. Perfectly cleaned containers can be submitted for recycling.

#### Waste management legislation

Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste, as amended. Decision 2000/532/EC establishing a list of wastes, as amended.

## SECTION 15: Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18th December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing the European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No. 793/93 and Commission Regulation (EC) No. 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC, as amended. REGULATION (EC) No. 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL as amended. Commission Regulation (EU) 2020/878 of 18 June 2020 amending Annex II to Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

### 15.2. Chemical safety assessment

A chemical safety assessment has not been carried out.

## SECTION 16: Other information

#### A list of standard risk phrases used in the safety data sheet

|      |                                                                                           |
|------|-------------------------------------------------------------------------------------------|
| H220 | Extremely flammable gas.                                                                  |
| H222 | Extremely flammable aerosol.                                                              |
| H225 | Highly flammable liquid and vapour.                                                       |
| H229 | Pressurised container: May burst if heated.                                               |
| H280 | Contains gas under pressure; may explode if heated.                                       |
| H304 | May be fatal if swallowed and enters airways.                                             |
| H315 | Causes skin irritation.                                                                   |
| H336 | May cause drowsiness or dizziness.                                                        |
| H361 | Suspected of damaging fertility or the unborn child.                                      |
| H373 | May cause damage to the nervous system through prolonged or repeated exposure if inhaled. |
| H411 | Toxic to aquatic life with long lasting effects.                                          |

#### Guidelines for safe handling used in the safety data sheet

|      |                                                                                                |
|------|------------------------------------------------------------------------------------------------|
| P102 | Keep out of reach of children.                                                                 |
| P210 | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
| P211 | Do not spray on an open flame or other ignition source.                                        |
| P251 | Do not pierce or burn, even after use.                                                         |

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

|               |                     |         |     |
|---------------|---------------------|---------|-----|
| Creation date | 27th September 2013 | Version | 6.0 |
| Revision date | 31st March 2025     |         |     |

P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50 °C.

P501 Dispose of contents/container to according to applicable regulations.

### Other important information about human health protection

The product must not be - unless specifically approved by the manufacturer/importer - used for purposes other than as per the Section 1. The user is responsible for adherence to all related health protection regulations.

### Key to abbreviations and acronyms used in the safety data sheet

|                        |                                                                                                   |
|------------------------|---------------------------------------------------------------------------------------------------|
| ADR                    | European agreement concerning the international carriage of dangerous goods by road               |
| Aerosol                | Aerosol                                                                                           |
| Aquatic Chronic        | Hazardous to the aquatic environment (chronic)                                                    |
| Asp. Tox.              | Aspiration hazard                                                                                 |
| BCF                    | Bioconcentration Factor                                                                           |
| CAS                    | Chemical Abstracts Service                                                                        |
| CLP                    | Regulation (EC) No 1272/2008 on classification, labelling and packaging of substance and mixtures |
| EC                     | Identification code for each substance listed in EINECS                                           |

| ISO                    | International Organization for Standardization                                                    |
| IUPAC                  | International Union of Pure and Applied Chemistry                                                 |
| log Kow                | Octanol-water partition coefficient                                                               |
| OEL                    | Occupational Exposure Limits                                                                      |
| PBT                    | Persistent, bioaccumulative and toxic                                                             |
| PMT                    | Persistent, mobile and toxic                                                                      |
| ppm                    | Parts per million                                                                                 |
| Press. Gas             | Gases under pressure                                                                              |
| Press. Gas (Comp.)     | Gas under pressure: compressed gas                                                                |
| Press. Gas (Diss.)     | Gas under pressure: dissolved gas                                                                 |
| Press. Gas (Liq.)      | Gas under pressure: liquefied gas                                                                 |
| Press. Gas (Ref. Liq.) | Gas under pressure: refrigerated liquefied gas                                                    |
| REACH                  | Registration, Evaluation, Authorisation and Restriction of Chemicals                              |
| Repr.                  | Reproductive toxicity                                                                             |
| RID                    | Agreement on the transport of dangerous goods by rail                                             |
| Skin Irrit.            | Skin irritation                                                                                   |
| STOT RE                | Specific target organ toxicity - repeated exposure                                                |
| STOT SE                | Specific target organ toxicity - single exposure                                                  |
| UN                     | Four-figure identification number of the substance or article taken from the UN Model Regulations |
| UVCB                   | Substances of unknown or variable composition, complex reaction products or biological materials  |
| VOC                    | Volatile organic compounds                                                                        |
| vPvB                   | Very persistent and very bioaccumulative                                                          |
| vPvM                   | Very persistent and very mobile                                                                   |

### Training guidelines

# SAFETY DATA SHEET

according to Commission Regulation (EU) 2020/878 as amended

## MA PROFESSIONAL PTFE GREASE

Creation date 27th September 2013

Revision date 31st March 2025

Version

6.0

Inform the personnel about the recommended ways of use, mandatory protective equipment, first aid and prohibited ways of handling the product.

### Recommended restrictions of use

not available

### Information about data sources used to compile the Safety Data Sheet

REGULATION (EC) No. 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL (REACH) as amended.  
REGULATION (EC) No. 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL as amended. Data from the manufacturer of the substance / mixture, if available - information from registration dossiers.

### The changes (which information has been added, deleted or modified)

The version 6.0 replaces the SDS version from Wednesday, 19 February 2025. Changes were made in sections 1, 2, 3 and 16.

### More information

Classification procedure - calculation method.

### Statement

The safety data sheet provides information aimed at ensuring safety and health protection at work and environmental protection. The provided information corresponds to the current status of knowledge and experience and complies with valid legal regulations. The information should not be understood as guaranteeing the suitability and usability of the product for a particular application.
